about *UDI*

UDI offers unmatched quality and a client-first driven approach. We provide full-service solutions, custom tailored to each partners' specific packaging requirements.

With 20 years in the industry, our experienced team allows customers to effortlessly optimize global supply chains.

commitment to *sustainability*

UDI is committed to developing industry leading sustainable packaging solutions, that can be easily integrated throughout your entire brand.

one stop shop

One contact for
all your packaging
needs. Our goal is to
provide customers a
comprehensive solution
for their entire sustainable
packaging lineup!

eco pod

mark II (50ml)

Working off the original version, this refined refillable jar system now features a thick wall jar and utilizes a built in POD locking assembly. POD can also be made with PCR for a truly sustainable package.

eco pod *airless jar*

This system combines industry proven airless technology with our refillable POD system. Instead of throwing away the entire package, consumers can insert a filled POD.

Allowing the jar, pump and over cap to be reused multiple times. PODs can also be made with PCR.

eco pod deodorant

50ml refillable deodorant
system.

This package utilises a
disposable PCR inner pod,
allowing the outer bottle, cap
and base to be reused.

After the consumer is finished
with the initial POD, simply insert
a replacement into the base.

eco pod airless

Refillable airless bottle system.

Using an inner POD, allowing
the over cap, pump and bottle
to be reused.

Disposable POD made with
100% PCR.

Available sizes:

30ml/50ml/80ml/120ml

refillable system

Help reduce the amount of plastic
in our environment with this
refillable aluminum bottle system.

Reuse: Refillable aluminum bottle
& pump

Reduce: Average 60% reduction in
plastic, compared to a single use
bottle.

Recycle: Recyclable aluminum
bottle and re-fill pouch.

PACKAGE & PLANT

Unique

DISTINCTIONS INC

UDI is happy to announce that we've teamed up with One Tree Planted in a partnership program that will allow UDI customers to plant trees with the purchase of sustainable packaging. **This partnership is designed to be a simple way for customers to get involved in global reforestation.**

Each tree planting program will be tailored to the specific goals of the end brand.

Brands will have the ability to print marketing material directly on the package, showcasing this program.

pcr *bottles*

100% PCR bottles are
here!

Please note these are just
a few examples & PCR
(Post-consumer recycled)
bottles are available in a
wide range of shapes and
sizes.

pcr deodorant

Finally, an eco-friendly
deodorant package! All
components are made
with up to 100% certified
PCR plastic (PP).

Available sizes:
30ml/50ml/75ml/90ml

pcr jar series

Thick-wall PET jar available
with 100% PCR? You heard it
here first!

0-100% PCR (Post-consumer
recycled) available

Available sizes:

15ml, 30ml, 50ml, 100ml

PCR TUBE
SERIES

pcr *tubes*

High quality and
affordable PCR
Tubes. 40% PCR
tube sidewall and
100% PCR cap.

Available in all
tube diameters
and custom fill
levels. (5ml-240ml)

pcr airless tubes

Airless tube technology
combined with 30% PCR
tube sidewall and 100% PCR
pump/ over cap.

Average 40% reduction in
total plastic compared to a
traditional 50ml airless bottle.

sugarcane *tube*

Sugarcane resin is created by extracting ethanol from renewable sugarcane plants and converting into PE. A great alternative compared to traditional fossil-based materials.

Available in all tube diameters and custom fill levels. (5ml-240ml)

mist tube

Lower plastic content when
compared to traditional
bottle and sprayer sets.

Paired with 30% PCR tube
sidewall to maximize package
sustainability.

Position tube cap up and
squeeze to spray formula.

custom projects

UDI provides an affordable avenue for customers looking to create 100% customized packaging.

- Low tooling cost
- Free drawings
- 3D Printed samples

aluminium *series*

Aluminium is a great alternative to plastic, close to 70% of aluminium produced is still in use today.

Available with custom color spray and direct print decoration.

This series highlights just a few of the available options.

glass series

Glass packaging provides a unique and stylish alternative to plastic packaging.

Custom color and direct print decoration available.

This series highlights just a few of the available options. Chat with us today to find out if glass packaging is right for you!

sourcing

Finding the right package solution for your product can be overwhelming. Let our dedicated sourcing team do the work for you! Working off limited information, our experienced team will be happy to provide multiple options and samples for you to review.
